This Report may be forwarded as you like without charge to individuals or governments around the world. It is provided as a Public Service at this time without cost because of the critical facts that we now faced economically. The contents and designs of the systems are in fact copyrighted.

A C K N O W L E D G E M E N T S

I would like to thank all the former employees, associates, sources, and contacts for their ongoing support and efforts to contribute to the writings I have been able to continue through their great efforts. I would also like to thank those who have looked after not just myself, but my family, and shown them support and kindness.

The purpose of these reports is to broaden the understanding that is so vital to our personal survival. Government cannot save us, and will only assist the very economic disaster we face. This is a **Sovereign Debt Crisis** that threatens our core survival. There is no plan to ever pay off debts. The majority of debt increase is paying interest perpetually to roll over without any long-term plan. What you see in Greece and in the States, we have run out of other people's money. The socialists keep pointing to the rich. But to fund the deficits, we need to borrow now from foreign lands. We ran out of money domestically and to support the current system like Greece, we need foreign capital. But all governments are facing the same crisis and we are on the verge of another widespread government default. Adam Smith warned in his **Wealth of Nations** that in 1776, no government paid off their debt and had always defaulted. We will have no choice either.

There is no hope that politicians will save us, for they only form committees to investigate after the shit-hits-the-fan. They will NOT risk their career for a future problem that may hit on someone else's watch. There was a politician and a average man standing on top of the Sears' Tower when a gust of wind blew them off. The average man being a realistic-pessimist, immediately sees he is about to die and begins praying. The politicians, the ultimate optimist, can be heard saying "Well so far so good!" as he passes the 4th floor.

At Princeton Economics, our mission was simply to gather global data and to bring that together to create the world's largest and most comprehensive computer system and model that would monitor the world capital flows. By creating that model, all the fallacies of market and economic theories were revealed. The world is far more dynamic and every change even in a distant land can alter the course of the global economy. Just as has been shown with the turmoil in Greece, a **CONTAGION** takes place and now capital begins to look around at all countries. We can no more comprehend the future but looking only at domestic issues today than we can do so in every other area, such as disease and the spread of flu.

We live in a **NEW DYNAMIC GLOBAL ECONOMY** where capital rushes around fleeing political changes and taxes just as it is attracted by prosperity. All the people who migrated to the United States in the 19th and 20th Centuries, came for the same reasons as those still coming from Mexico - jobs and prosperity. In the 19th Century, America was said to have so much wealth, its streets were paved in gold. We must now look to both the past and the entire world to understand where we now are today,
